Full Stack Developer (Node.js + React.js)

SUMMARY

Full Stack Developer with around 1 year of practical experience in building, maintaining, and scaling enterprise SaaS platforms and logistics application systems. Strong hands-on expertise in backend architecture using **Node.js and PostgreSQL**, and responsive frontend interfaces using **React.js**. Experienced in multi-tenant data isolation, third-party logistics API integrations, RESTful APIs, authentication workflows, CRUD management, and production troubleshooting.

EXPERIENCE

VizLabs

Sep 2025 – Present

Full Stack Developer (Node.js & React.js)

India

- **Enterprise SaaS Development:** Developed and maintained backend services and web features for complex logistics platforms using **Node.js, Express.js, Prisma ORM, and PostgreSQL**.
- **Backend & REST APIs:** Built scalable RESTful APIs for order processing, wallet management, freight rate calculation, reverse logistics logic, and shipment tracking workflows.
- **Frontend Integration:** Developed dynamic, responsive user interfaces and admin dashboards using **React.js, RTK Query, and Tailwind CSS**, connecting complex API endpoints with state-managed frontend components.
- **Database Management:** Designed relational schemas, created efficient SQL queries, handled CRUD operations, and managed migrations using PostgreSQL and pgAdmin.
- **Authentication & Access Control:** Built authentication, token management, and role-based access control (RBAC) across client, enterprise, and admin accounts.
- **Third-Party API Integrations:** Integrated 10+ major logistics service providers (DTDC, Gati, Delhivery, Blue Dart, NimbusPost, Shipmozo, PUDO, DP World, etc.) for automated order booking, docket generation, and status syncing.
- **Troubleshooting & Debugging:** Debugged production bugs, analyzed system logs, verified payload structures, and managed MinIO object storage for shipment files to ensure smooth operating workflow.

PROJECTS

SureShip

Node.js | Express.js | PostgreSQL | React.js | RTK Query

- Developed core features for **SureShip**, an end-to-end logistics platform managing both B2C and B2B shipping operations, order workflows, and carrier routing.
- Integrated third-party courier partner APIs for automated rate comparison, booking creation, order tracking, and status webhook listeners.
- Built interactive dashboards in React.js for managing order lifecycles, customer accounts, parcel dispatch status, and shipping logs.

Multi-Tenant

Node.js | Express.js | Prisma | PostgreSQL | React.js

- Engineered backend and frontend modules for a **white-labeled multi-tenant logistics SaaS architecture** designed to serve independent business tenants with isolated workflows and dynamic branding.
- Implemented isolated tenant configuration handling for shipping rates, customer access roles, LSP preferences, and order channels.
- Built automated channel fulfillment synchronization, wallet calculation rules, shipment charge deduction/reversal logic, and tenant-specific scan/ticket management.

- Built **Ruchi Makeover**, an AI-generated web application developed using **Next.js**, showcasing rapid prototyping and AI-assisted full-stack development workflows.
- Designed a responsive, modern user interface with component-based architecture, leveraging AI tools to accelerate design-to-code implementation.

SKILLS

Languages : JavaScript, SQL , c , basic Java

Backend : Node.js, Express.js, REST APIs, Prisma ORM

Frontend : React.js, Next.js, RTK Query, Tailwind CSS, HTML5, CSS3

Database : PostgreSQL, MySQL, Relational Schema Design, CRUD Operations

Integrations : DTDC, Gati, Delhivery, Blue Dart, NimbusPost, Shipmozo, PUDO, DP World, Criticalog, Ekart , Many More...

Tools & Storage : Git, GitHub, Postman, pgAdmin, MinIO, cURL

Concepts : Multi-Tenant Architecture, Enterprise Web Applications, REST API Development, Authentication & Authorization, Troubleshooting & Debugging

EDUCATION

Meerut Institute of Engineering and Technology (MIET)

Master of Computer Applications (MCA)

Subharti University

Bachelor of Computer Applications (BCA)
